				<b>COST PER CWT. 2000 LBS. YIELD</b>		<b>3.20</b>	

JOHN H. LINDT, JR. - A. DOYLE REED

FARM MANAGEMENT BRIEFS can help you in:

- \* Analyzing the various enterprises which may best fit your farm.
- \* Budgeting for cash operating expenses.

PRACTICES INVOLVED IN CROP PRODUCTION ARE VARIABLE WITHIN THE COUNTY DUE TO DIFFERENCES IN SIZE OF OPERATIONS SOIL TYPES, AND GROWER'S PREFERENCE.

THE COSTS IN THE TABLE ARE BASED ON TYPICAL OPERATIONS FOR GOOD FARMING PRACTICES. THE PRODUCTION COSTS AND YIELDS LISTED IN THIS LEAFLET AND OTHERS OF THIS SERIES ARE NOT INTENDED TO REPRESENT THE *averages* FOR SUTTER COUNTY.

The greatest single factor in determining your cost of production per unit is *YIELD*. You may increase your efficiency by:

- \* Planting the adapted variety on soils suitable for high production.
- \* Avoid unnecessary operations in seed bed preparation.
- \* Avoid overfertilizing as well as underfertilizing the crop.
- \* Plan your operations to meet the most favorable time in planting and harvesting. This will help insure maximum yields.
