SUMMER-PLANTED STRAWBERRIES SAMPLE PRODUCTION COSTS
Orange-Los Angeles Counties (1975)

The table on the reverse side shows sample costs for producing summer-planted strawberries in Orange and Los Angeles Counties. The cost data summary was made to help the grower better analyze the economics of his strawberry operation. The sample costs represent typical costs of efficient commercial operations in Orange and Los Angeles Counties. They are presented only as a guide and do not represent the industry's average costs of production.

Sample costs are based on the following assumptions:

1. The land being farmed has been planted to strawberries for at least two consecutive years and is proven berry ground.
2. The crop is grown as an annual, requiring land-leveling, fumigation, and replanting each year.
3. The operation is a ten-acre planting on leased land in Los Angeles or Orange County.
4. The farm is owner-operated with no charge made for management.
5. Water costs are based on cost of city water. Water from various sources such as well water, metropolitan and municipal water districts would vary in cost.
6. Sample costs are preharvest costs only. Harvesting costs, including trays, baskets, clips, and picking, range between \$1.25-1.50 for each 12-pint tray of fruit. A 5-10¢ per tray handling charge should also be included.
7. Principal varieties grown are Tioga and Tufts.
8. Summer-planted strawberries produce about 4000 12-pint trays/acre in Orange County.
9. If drip irrigation is used water cost may be reduced, however, the installation costs run \$500-800 per acre the first year and \$300-500 during subsequent years.

Prepared by: Tom Hales, Farm Advisor, Orange and Los Angeles Counties; Victor Voth, Pomologist, UC South Coast Field Station; and Robert C. Rock, Extension Economist, University of California, Riverside.

The University of California's Extension programs are available to all, without regard to race, color, or national origin. 2-3-75

Cost Item, Operation & Equipment	Hours Per Acre	Costs Per Acre			Total Cost	
		Hired Labor	Tractor & Equipment	Material--kind & amount--cost		
Remove old plastic from bed	12	\$ 27.00			\$ 27.00	
Disc, plow, level 6 times, chisel 4 times furrow, harrow	15	45.00	\$ 37.50		82.50	
Grade, stake	5	12.50			12.50
